

AI-Powered Export Compliance Skills Engine

Built by ExChek, Inc. | Frontier model-agnostic (Claude, ChatGPT, Perplexity, Grok, etc.) | exchek.us

What is ExChek?

ExChek is a **frontier model-agnostic compliance engine** built by ExChek, Inc. that brings U.S. export compliance directly into your AI platform of choice — Claude, ChatGPT, Perplexity, Grok, and more. Each skill handles a specific compliance workflow — classification, screening, licensing, risk triage — producing **audit-ready documentation** that aligns with BIS and DDTC expectations. No IT integration required. No six-month implementation. Start free, deploy the same day.

20 Purpose-Built Compliance Skills

■ Classify ECCN + ITAR/EAR jurisdiction with audit-ready memos	■ Screen (CSL) Denied-party screening via Trade.gov API	■ License License determination + exception analysis (738/740)	■ Risk Triage Low/Med/High scoring with escalation notes
■ Red Flag BIS Know Your Customer checklist (Supp. 3)	■ Country Risk Destination risk one-pagers	■ Deemed Export Foreign national access review (734.2(b))	■ Encryption 5A992/5D992 and ENC classification + reporting
■ Compliance Report CARFAX-style report cards (PASS/HOLD)	■ Audit Lookback Retrospective audit of historical shipments	■ Partner Compliance Distributor / partner compliance packs	■ Recordkeeping Retention schedules under 15 CFR 762
■ Export Docs Invoice blocks, SLI, AES/EEI data prep	■ ECP Generator Full ECP, SOPs, and training outlines	■ Jurisdiction ITAR vs. EAR jurisdiction analysis	■ Orchestrator /exchek co-pilot: routes + tracks every transaction
■ Setup First-run wizard: profile, API, CRM/ERP connectors	■ Onboarding 60-min hands-on; produces real compliance artifacts	■ Analytics Audit Readiness Score (0-100) dashboard	■ Docx Export Convert reports to client-ready Word documents

Why ExChek?

Free to start — every skill runs free with no auth, right inside your AI platform. Enterprise features (branded PDF rendering, priority support) are simple pay-per-use.

Audit-ready output — every skill produces documentation aligned with BIS/DDTC expectations and 15 CFR 762 retention.

CRM/ERP integration — skills pull from and push to HubSpot, Salesforce, and other systems.

Immediate deployment — skills run inside Claude, ChatGPT, and other frontier models right now. No IT project, no vendor onboarding, no waiting.

Defensibility — a documented, consistent compliance process shows BIS good-faith effort, even without a full-time ECO.

Scales with you — from first export to hundreds of shipments per month — same engine, same quality.
